

## Information session summary

Pursuant to section 65.1 of the Mining Act, the holder shall hold an information session on annual work planning with each of the representatives referred to in the first paragraph who so request. During an information session, the representative may make observations and present information complementary to that presented by the holder.

The holder shall publish on its website or by another means of publication authorized by the Minister, within 30 days after the information session, the annual work planning and, if applicable, a summary of the information session.

### Section 1: Identification of the exploration project

Exclusive exploration right holder

12942534 Canada Ltd.

Name of exploration project

Matoush

Nature of planned work

The 2026 work plan is a non impact-causing work program and will include 1) multiple ground-based geophysical surveys of magnetics-vlf, and 2) a biogeochemical survey on black spruce trees, collecting approximately 500-1000 samples. A helicopter will only be used for a few days (<10 days) to reach selected remote locations. The project will sample in discrete areas within a 100 km<sup>2</sup> area. The work crew will vary between 10-12 workers (prioritizing hiring Mistissini members).

## Section 2: The information session regarding the annual work planning

*In this section, please describe the information session(s).*

Entity	Date of the session	Communication method	Comments
IsoEnergy	2026-01-29	Meeting in person	In January 2026, members of the IsoEnergy team travelled to Mistissini for a planned meeting and dinner with the Tallymen and their families. Due to a tragedy in the community that day, the scheduled events were respectfully postponed and have since been rescheduled for June 2. During their time in the community, IsoEnergy representatives met with MSN contact Patrick Wapachee and shared a presentation outlining their 2025 work at Matoush with him and community leadership. Despite the cancellations, two Tallymen were able to meet directly with the IsoEnergy team during the visit.
