

# The Eagle Project

## Athabasca Basin, Saskatchewan

### Directors

Leigh Curyer, *Chairman*  
Craig Parry, *President and CEO*  
Christopher McFadden  
Richard Patricio  
Trevor Thiele

### Management

Craig Parry, *President and CEO*  
Steve Blower, *VP Exploration*  
Janine Richardson, *CFO*  
Keith Bodnarchuk, *Corp Dev Manager*  
Andy Carmichael, *Senior Geologist*  
Justin Rodko, *Project Geologist*

The Eagle project is located 47 kilometres west of McClean Lake mine and 37 kilometers southwest of Hurricane Zone. The project comprises one claim covering 5,887 hectares. The vertical depth to the unconformity intersected in neighboring drill holes is 530 to 675 metres.

## Historical Work

### 1970's: Shell Resources Canada Ltd.

- Combination of airborne VLF-EM and radiometric surveying, lake sediment and boulder sampling, prospecting, and mapping

### 1980's: Shell Resources Canada Ltd.

- Seismic surveying, radiometric prospecting, and combination of radon, biogeochemical and till surveying

### 2000's: Pitchstone Exploration Ltd.

- Aeromagnetic and fixed loop EM surveying, soil geochemical surveying
- Geochemical results of soil sampling indicated elevated concentrations of several uranium pathfinder elements

## Potential

- The Eagle Project covers 15 kilometres of northwest-trending magnetic low branching off the fertile Larocque Lake trend
- No drill holes have been completed on the property
- Eagle is located near existing infrastructure with Highway 905 and powerlines situated 16 kilometres east of the project
- Minimal modern exploration has been applied on the property

## Next Steps

- DC-Resistivity surveying to map sandstone alteration and basement structure
- Drill test areas of structural complexity

## Eagle Claim Summary

Claim	Hectares	Effective Date	Annual Assessment	Expiry Date
MC00014105	5,887	June 19, 2020	\$88,305	Sept. 17, 2022
<b>Total</b>	<b>5,887</b>		<b>\$88,305</b>
